

NEW BELLSOUTH 100TT TOUGH AND TROPICAL

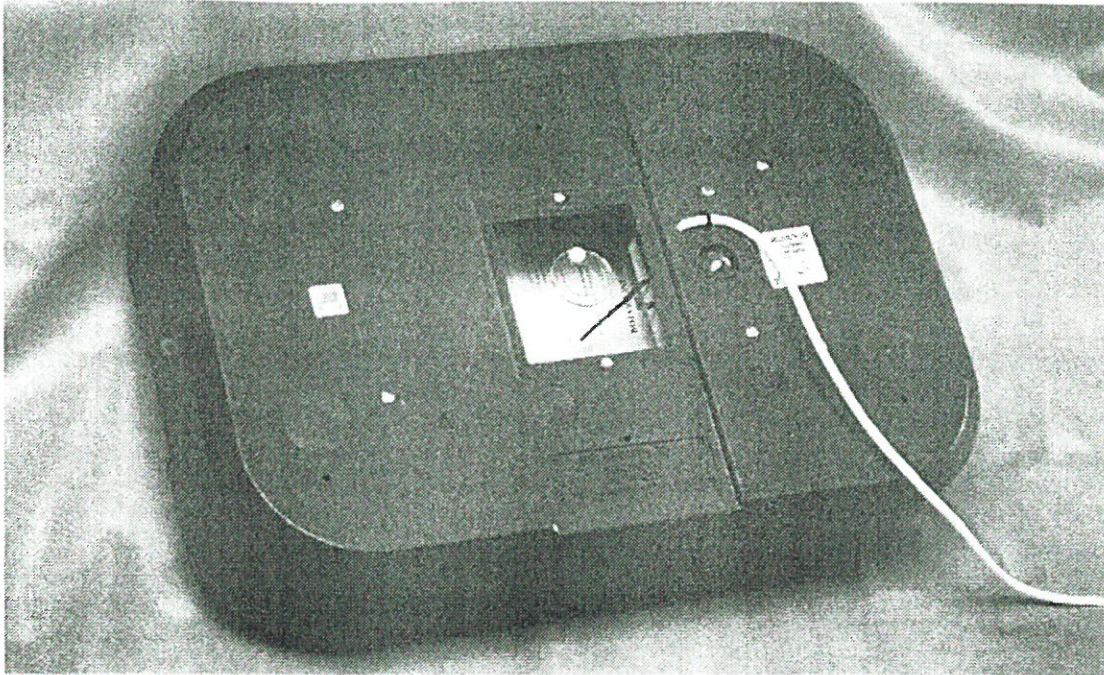

The Bellsouth 100 has proven itself to be one of the most efficient and low cost incubators Australia has ever seen. With sales over 12000 since 1986, it has set some records which will stand for a long time. When introduced, the Bellsouth 100 was a revolution in technology, making low cost incubation available to everyone. However, new times create new demands. The simplicity of the Bellsouth 100 becomes a limitation in locations with high room temperatures and high humidities. The new markets in these locations has prompted the development of adjustable ventilation to enable the Bellsouth 100 to cope with these adverse conditions. In addition developments in technology have opened new materials for moulded cases, and so the Bellsouth 100TT (TOUGH AND TROPICAL) was born. Being released in 2001 the case of our Tough and Tropical incubator looks like that monolith from the famous movie. Hard black and glossy, the new case material, along with the adjustable ventilation controls means even better performance in adverse conditions. We think you will like it!

TWELVE REASONS WHY THE BELLSOUTH 100 ELECTRONIC INCUBATOR IS A GOOD PERFORMER AND YET ATTRACTIVELY PRICED.

- | | |
|---|---|
| <ul style="list-style-type: none"> 1 Rational design, max. space for minimum materials. 2 Uniform flat moldings mean uniform heat distribution. 3 Modern energy-conserving materials mean low power use and high insulation factors. 4 Large capacity - manual: 100 chicken, 120 pheasant, 270 quail, 50 duck
automatic: 50 chicken, 60 pheasant 140, quail 25 duck | <ul style="list-style-type: none"> 5 Flexible, available as Manual turn or Automatic turn. Manual can be upgraded to automatic at a later stage. 6 High impact resistance body 7 Built in water channels for humidity control 8 Electronic temperature control 9 Light weight means low cost freight 10 Easy read black line thermometer 11 Large scale manufacture means low prices 12 No CFC in manufacture and no Mercury in thermometer |
