

Taipan Traders P.D.S Data for Egg Cleanzer

CAUTION - Poison S6 • DG-Class 8 • UN1791 • HAZ 2X • PG III • Alkaline Hydrochlorite Solution • EPG 8A1

Safety Advice: Taipan Traders strongly advise that the user of this product must read and fully understand both the PDS and MSDS data before using product.

Egg Cleanzer is a liquid alkaline chlorinated low foam detergent. This product will remove soilage on exterior of Egg Shells and sanitise. Egg Cleanzer is built on Potassium Hydroxide (not Caustic) and Chlorine coupled with water softening agents and a low foam surfactant system. Egg Cleanzer is injected into water holding tank of the egg washing machine via a computer pump. *Refer to MSDS data for more detailed information.*

CLEAN SANITISED EGGS = SAFE FOOD

Directions:

Dose Rate - May vary due to soilage deposits. Approx 300 - 400 p.p.m. pH 10.9
