

Taipan Traders P.D.S Data for Egg Equipment Cleaner/Sanitiser

CAUTION - PGIII • Non Hazedous Bio-degradable

WARNING: Must wear Australian approved full safety equipment when using this product at all times. Taipan Traders will not take responsibility for misuse of this product. Please ensure you read and understand P.D.S. & M.S.D.S. Data before using this product.

This compound is a high quality detergent/sanitiser containing a very active anti-bacterial agent. Egg Equipment Cleaner/Sanitiser is used for hand scrubbing all poultry equipment with safety in mind for a thorough hygienic effect. This product may be used through foaming equipment or high pressure water equipment. Egg Equipment Cleaner/Sanitiser removes poultry soils and waste bi-products. Always rinse down with fresh potable water. *Refer to MSDS data for more detailed information.*

Method of Use: Dilute product to a suggested ratio of 1 part product to 20-40 parts water for best results, hand scrub and rinse down with fresh potable water. May be used via foaming equipment or high pressure water system.

Storage: Product is to be stored in a cool, protected area. Sheltered from sun and rain. Do not stack drums on top of each other, due to possible chemical hazard. Do not store near other reactive chemicals. Refer MSDS data.

Safety Directions: Avoid Eye Contact.

First Aid: If swallowed contact a doctor or poisons information centre. Phone 13 11 26. If product makes contact with eyes, flush eyes with fresh water immediately for at least 15 minutes.

Emergency Phone: 0499 555 222
