

# Taipan Traders P.D.S Data for Viperfoam - Plus

**CAUTION** - Poison S5 • DG-Class 8 • UN1760 • HAZ 2R • PG III • Caustic Alkali Liquid N.O.S • EPG 8A1

**Safety Advice:** Taipan Traders strongly advise that the user of this product must read and fully understand both the PDS and MSDS data before using product.

Highly concentrated fixotropic alkaline chlorinated foaming detergent. Viperfoam Plus is potassium hydroxide based, this product breaks down animal oils, fats, blood, grease and soil build up rapidly. When surfaces are foamed and hand scrubbed = SANITISED EQUIPMENT = SAFE FOOD. Viperfoam Plus sanitisers instantly due to high levels of stable chlorine. This product is ideal for the food industry such as abattoirs - red/white meat and game establishments, butcher shops, small goods and food manufacturing plants, piggeries, beverage and fruit juice manufacturers etc. Viperfoam Plus is loaded with high quality surfactants, allowing this product to cling vertically on surfaces for extended periods of time. Viperfoam Plus is suitable for the abattoir industry. *Refer to MSDS data for more detailed information.*

- Always rinse off Viperfoam Plus with fresh, hot, potable water.

## **CLEAN SANITISED EQUIPMENT = SAFE FOOD**

### **Directions:**

**Foaming Application - Heavy Soils** - Use 1 part Viperfoam Plus to 20 - 40 parts water via foaming equipment. Apply to surface, hand scrub, rinse off with fresh, hot, potable water.

**Manual Application** - Use 1 part (200ml = 1 cup) of Viperfoam Plus to 40 parts water (1 bucket = 8 litres) hand scrub, rinse down with fresh, hot, potable water.

**Soak Process - Cutting Boards** - Use over night using 1 part Viperfoam Plus to 20 parts water, hand scrub whilst wearing protective gloves after 12 hours, rinse off with fresh, hot, potable water.

**Storage:** Product is to be stored in a cool, protected area. Sheltered from sun and rain. Do not stack drums on top of each other, due to possible chemical hazard. Do not store near other reactive chemicals. Refer MSDS data.

**Safety Directions:** Wear eye protection, gloves, rubber apron and boots. Avoid eye and skin contact with solution. Avoid inhalation of powder and or fumes.

**First Aid:** If swallowed contact a doctor or poisons information centre. Phone 13 11 26. If product makes contact with eyes, flush eyes with fresh water immediately for at least 15 minutes. Skin contact remove contaminated clothing, wash skin with neutral soap and water and report to doctor as soon as possible with MSDS data.
