

RX2 Incubator - The Breeder's Choice

Standard Features

- Solid State Temperature Control
- Thermal Wafer Over Temperature Backup
- Large Capacity Outside Water Bottle
- Mercury Wet & Dry Bulb Thermometers

Options Available

- Automatic Egg Turning
- Thermal Wafer Alarm Circuit
- Automatic Humidity Control

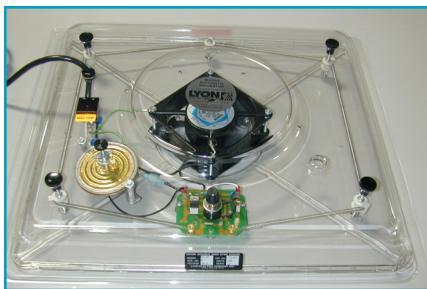

Model RX2 Incubator With Solid State Temperature Control

The Model RX2 has been the breeder's standard. Universities and laboratories also use the RX2 for science and research programs. A separate outside water bottle allows you to open the dome at anytime WITHOUT spilling any water. The mercury thermometers are accurate to approximately $\pm 1/2^\circ\text{F}$ and have a scale calibrated from 70°F to 110°F graduated in $1/2^\circ\text{F}$ increments. One egg turning grid is furnished with each RX2. Specify the grid desired from information on the following page.

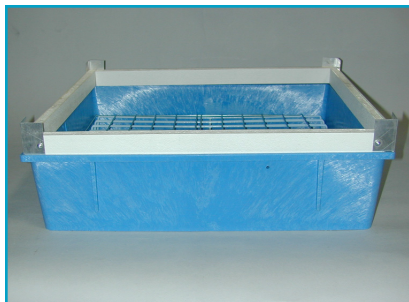

Solid state temperature control on the RX2 is available in a single turn or a ten turn potentiometer version, the 10-Turn being our best choice. The single turn solid state temperature control covers the incubator's operating range from its nominal minimum of 80°F in a 270° rotation arc. See ordering information for the catalog number. Automatic humidity control is now available for those requiring this option.

10-Turn Solid State Temperature Control

The ten turn solid state temperature control provides an incubation range of approximately 90°F to 106°F . A Ten-Turn Potentiometer allows a highly precise temperature setting. See ordering information for catalog number.

ROLL-X SPACER FOR GOOSE AND PEACOCK EGGS

Some types of Goose and Peacock eggs require additional height in the Roll-X Incubator. The spacer raises the Roll-X dome $1\ 1/2''$ and eliminates any interference during egg turning.

CATALOG NUMBER	DESCRIPTION
940-045	Goose & Peacock Egg Spacer (Shown As Mounted On RX Base)

RX2 INCUBATOR WITH 10-TURN SOLID STATE TEMPERATURE CONTROL

CATALOG NUMBER	DESCRIPTION	VOLTAGE
910-063	RX2 Incubator 10 Turn Control	120 VAC
910-064	RX2 Incubator 10 Turn Control	230 VAC

Add Suffix "A" For Automatic Egg Turning

RX2 INCUBATOR WITH SINGLE TURN SOLID STATE TEMPERATURE CONTROL

CATALOG NUMBER	DESCRIPTION	VOLTAGE
910-059	RX2 Incubator Single Turn Control	120 VAC
910-060	RX2 Incubator Single Turn Control	230 VAC

Add Suffix "A" For Automatic Egg Turning

EGG GRIDS FOR ROLL-X INCUBATORS

NOTE: One turning grid is included in the purchase price of your incubator. Specify which grid you desire from the chart below. Additional grids may be purchased as needed. Individual eggs may vary in size requiring a smaller or larger grid.

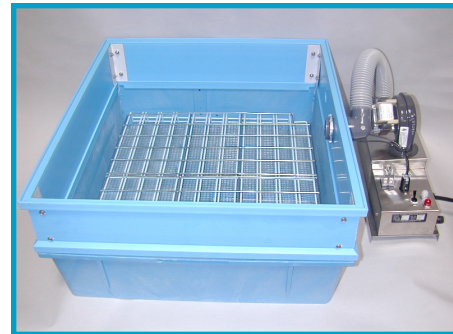

CATALOG NUMBER	DESCRIPTION
940-033	209 African Greys, Mini Macaws, Small Cockatoos, Large Cockatiels, American Kestrel, Conures, Quail or Similar, (3/4" to 1 1/4" egg size)
940-034	109 Pheasant, Bantam, Large Macaws (Blue & Gold / Scarlet, Hyacinth), Large Cockatoos (moluccan and Umbrella), Chukar, European Sparrow Hawk, Merlin, Hobby Falcon or similar (1 1/4" to 1 1/2" egg size)
940-035	89 Average Chicken, Peregrine Falcon, Prairie Falcon, Lanner Falcon, Harris Hawk, or similar (1 1/2" to 1 5/8" egg size)
940-036	71 Large Chicken, Gyrfalcon, Saker Falcon, Goshawk, or similar (1 3/8" to 1 7/8" egg size)
940-037	55 Turkey, Duck, Chicken, Redtail Hawk, Ferruginous Hawk, Common Buzzard, or similar (1 3/4" to 2 1/8" egg size)
940-038	29 Goose, Toulouse, Pea Fowl or similar (2 1/8" to 2 3/4" egg size)

RX2 Extender Kit For Use With R1 Humidifier

Tired of struggling with humidity control? Our R1 Humidifiers can now be adapted to our RX Incubators. A base extender kit and the humidifier itself will eliminate the need of refilling water bottles and constant adjustments.

Advantages

- Mounts On The Outside Of The Incubator
- Eliminates Constant Wet Bulb Readings and Adjustments
- Eliminates Messy Water Pans
- Adaptable To Most Small Incubators
- Retrofit Your Lyon Roll-X Incubator With A Base Extender To Obtain Automatic Humidity Control

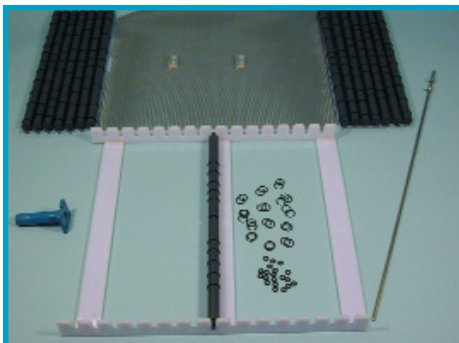

CATALOG NUMBER	DESCRIPTION
940-061	RX2 Plastic Extender (Shown As Mounted On RX Base)

Roll-X Incubators

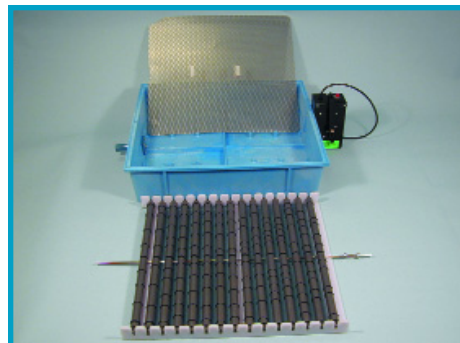

Roller System for the Lyon/Marsh Roll-X

Lyon Electric Company is proud to announce the release of our new and long awaited verdatile egg roller system. This new kit (940-090), will allow our Roll-X users to retrofit the incubators, so as to be able to incubate many different types and sizes of eggs simultaneously. Upgrade Your Roll-X Now.

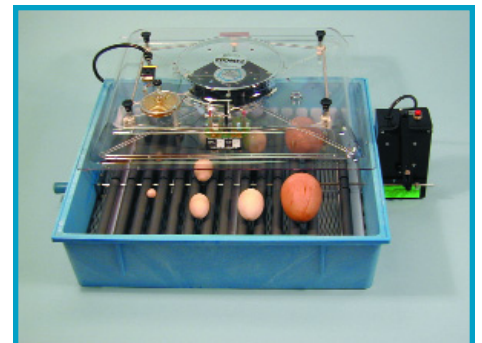

RX Roller Kit consists of roller base, perforated screen, 15 rollers, o-rings, extension tube and turning rod.

#940-090

Kit can be purchased with modified blue base and roller kit assembled. Turning motor as pictured not included in price.

#940-091A

Shown above, Roller Kit installed in RX2 incubator. Smooth and gentle action gently rolls the eggs. Adjustable throw for different size eggs. Kit is complete, some assembly required.

#910-150A
